

Practical 1B :Printed Pass

```
#include <stdio.h>

#include <string.h>

#define MAX_LENGTH 100

int main() {

    char username[MAX_LENGTH];

    char password[MAX_LENGTH];

    printf("Enter User name: ");

    fgets(username, MAX_LENGTH, stdin);

    username[strcspn(username, "\n")] = '\0'; // Remove trailing newline

    printf("Enter the password <any 8 characters>: ");

    scanf("%s", password);

    printf("*****\n");

    printf("\nYour password is: ");

    printf("%s\n", password);

    return 0;

}
```
